- 400W commercial motor head is the most powerful in its class; 120V

Certifications

ETL Sanitation

5-15P

ETL, US

Technical Data

High Speed Mix Time	15000 RPM
Horsepower Per Spindle	1/2 hp
Low Speed Mix Time	10000 RPM
Material	Stainless Steel
Number of Spindles	1 Spindles
Plug Type	NEMA 5-15P
Speeds	2 Speed
Style	Wall Mount
Type	Spindle Mixers

Notes & Details

Whipping up a milkshake or frozen beverage has never been easier with the AvaMix ADM1-WM wall mount single spindle drink mixer / milkshake machine. A convenient hook on the machine operates as a cup rest and engages the power button to support the hands-free, stress-free operation to optimize your prep time. There are two holding positions for the cup, allowing the user to change the height at which the spindle is mixing in the malt cup for maximum control and to achieve the desired thickness every time. This drink mixer is easy to use with a convenient rocker switch to operate its 2 speeds for the ultimate texture with hard or soft ice cream. For milkshakes using hard ice cream or mix-ins, simply add milk to your ice cream of choice and blend until smooth. Even with thicker, harder ingredients, this milkshake machine includes 2 agitators on the spindle to help you get the job done effectively and quickly. This wall mount unit is the perfect complement to any ice cream shop, diner, or restaurant!

A 32 oz. malt cup made of stainless steel is included. Not only is it durable and easy to clean, it keeps the beverage cold as it's prepared. It also boasts a one-piece design, meaning that it won't leak at the base like other malt cups. Plus, markings on the cup show the minimum and maximum fill lines for easy use.

This machine features a robust 400W motor head, which is the most powerful on the market in its class. The high power motor delivers exceptionally high quality results in very little time. Its heavy-duty stainless steel spindle and construction holds up to high demand and also means that it will withstand commercial environments. It operates quietly and mounts to the wall to help free-up counterspace for other tasks. It mounts easily too, coming with 4 screws and pre-drilled holes to simplify set up and save countertop space. Built for regular use in high-volume establishments, the machine ships with a replacement agitator set so that your business can enjoy consistent operation with minimal down-time. A 120V electrical connection is required for operation.
