## Notes & Details

The AvaMix BX1000T2J commercial blender with toggle controls combines raw power and maximum simplicity in a blender that can stand up to even the busiest bars and restaurants! Its 3 1/2 hp motor boasts a whopping 26,000 RPM and 1800W, making it one of the most powerful blenders available in its class - and with a metal drive coupling and blade assembly, it is more than capable of handling ice crushing, drink mixing, smoothies, house-made spreads or salsa, and anything else you can throw at it.

Operation couldn't be simpler, either. A simple toggle switch with "High", "Low", and "Off" settings takes all the guesswork out of your drink recipes and makes it easy for staff of all skill and experience levels to operate. When you need a quick burst of power to finish off a recipe or clear the blade area, it also has a convenient pulse switch to throttle the unit on "High" speed.

The 48 oz. BPA-free Eastman Tritan™ jar design provides maximum durability while allowing this model to handle large volume blending, and your blender comes with 2 of them so that you can swap out the jar and keep working without having to stop and wash the container for different recipes. A 2-piece lid lets you add ingredients to the blender at any stage in the mixing process - simply remove the clear center lid and use the included tamper to push the add-ins down into the jar. A sleek and sturdy ABS plastic base looks great on any bar counter while also making it easy to clean. For added convenience the jar pad is dishwasher safe, but the jar should be washed by hand for maximum product life. This blender requires a 120V electrical connection.
