

AvaMix Revolution CFP342D Continuous Feed Food Processor with 2 Discs - 1 hp

#928CFP342D

Technical Data

Width	11 Inches
Depth	12 Inches
Height	23 Inches
Base Height	13 1/2 Inches
Phase	1 Phase
Voltage	120 Volts
Wattage	735 Watts
Hopper Style	Half Moon
Horsepower	1 hp
Number of Discs	2 Discs

Features

- Featured pulse button and powerful 1 hp direct-drive motor with stainless steel motor shaft
- Continuous feed attachment allows for constant slicing and grating, reducing manual work
- Includes (1) 5/32" slicing disc and (1) 5/64" grating disc, with the option of purchasing more discs
- Safety magnet stops the blades from spinning until continuous feed attachment is properly in place
- Great for a wide variety of vegetable slicing and grating applications

Certifications

5-15P

ETL Sanitation

ETL, US & Canada

Technical Data

Plug Type	NEMA 5-15P
RPM	1500 RPM
Speeds	1 Speed
Type	Continuous Feed Processors

Notes & Details

Cut down on prep time while cutting and mixing a variety of ingredients with the Avantco Revolution CFP342D 1 hp continuous feed commercial food processor! With 1 hp, this robust unit packs the requisite power to handle large quantities of fruits and vegetables. Additionally, the pulse button makes processing food even faster and easier, since you can pulse until your desired consistency is achieved. Its build includes a durable base with nonskid feet for secure use, while its direct drive motor with stainless steel motor shaft and stainless steel blades will hold up to the demands of commercial operations.

The CFP342D comes with a continuous feed attachment to further increase prep speed, as well as a 5/32" slicing disc, a 5/64" grating disc, and a plastic ejector disc for improved flexibility. The continuous feed attachment, which has a 6" x 3" kidney opening and 2" cylindrical opening, is ideal for processing vegetables like cucumbers, carrots, celery, and other similar product. The kidney chute, which has an included pusher, is equipped with a magnetic failsafe that automatically shuts down the motor when the pusher is removed. As an added safety precaution, the blades will not spin unless the continuous feed is completely locked in place.

The AvaMix CFP342D is easy to control, as it has a simple on/off switch located conveniently on the side. It's also compact in size, measuring just 10" x 12" x 18 1/2", which makes it suitable for establishments that have limited counterspace. And because it disassembles, you can easily store it away when not use. The food processor requires a 120V connection for operation.

Included Discs:

- 5/32" (4mm) Slicing Disc
- 5/64" (2mm) Grating Disc
